

CASTLE STONE PRODUCTS

Castle Stone is a *locally-owned* manufacturer of high-quality architectural stone products. Castle Stone manufactures and distributes architectural stone in the Missouri and Illinois markets for residential and commercial clients. At Castle Stone products we combine the beauty of natural stone with the structural integrity and durability of masonry to create remarkably detailed architectural stone. Being regionally located and producing great product...here's what else you get with Castle Stone:

- Stone that has superb detail and definition—since our products are produced in molds made from the actual stone.
- We use only the finest ingredients...Type III Portland Cement, powdered dyes—not liquid, and aggregate that makes our stone some of the lightest weight and strongest architectural stone in the market today
- Variety of stones to choose from: Limestone, Shale, Fieldstone, Mountain Ledge, Cut Lime, Thin Brick—amongst others
- Our products satisfy all building code specifications and ASTM requirements and can help contribute to LEEDS qualifications
- In addition to our best selling standard color offerings, we can custom color any of our stone to your clients request

In addition to their traditional stone veneers, Castle Stone also markets their **SportStone** line of stone products; stone accents that mirror team colors of local collegiate and professional sports teams. As well, **Creative Columns**, the company's line of assembled stone columns and privacy walls; versatile, lightweight and at a fraction of the cost of full masonry columns.

For more information, visit us at www.CastleStoneProducts.com or visit our showroom M – F, 8am – 4pm (11680 Lackland, St. Louis, MO 63146); weekends by appointment.
